Australian Vanadium eyes energy market

Australian Vanadium subsidiary, VSUN Energy has appointed commercialisation consultant TFMS to perform residential energy storage study and VSUN Energy's potential within it.

The analysis undertaken by TFMS will cover a review of competitors in the residential energy storage marketplace and the points of difference a vanadium redox flow battery can provide.

It will analyse the financial structure and economic viability of local manufacture compared to procurement. Potential funding and strategic partners will be assessed and recommendations made.
