

INTERNATIONAL EXHIBITION SERIES FOR  
BATTERIES AND ENERGY STORAGE SYSTEMS

点击这里访问我们的中文网站

If you need to know about batteries; you've come to the right place

## Upcoming Events

### THE 1st OIL & GAS BATTERY CONFERENCE & EXHIBITION

Tuesday, 23 August, 2016 to Thursday, 25 August, 2016

### 15th European Lead Battery Conference (15ELBC) and Exhibition

Tuesday, 13 September, 2016 to Friday, 16 September, 2016

### Electric & Hybrid Vehicle Technology Expo

Tuesday, 13 September, 2016 to Thursday, 15 September, 2016

### The Battery Show

Tuesday, 13 September, 2016 to Thursday, 15 September, 2016

### 21st International Congress for Battery Recycling ICBR

Wednesday, 14 September, 2016 to Friday, 16 September, 2016

### Batteries Event 2016

**Affordability**

Fri, 07/15/2016 - 10:24 -- Paul Crompton

Materials company Australian Vanadium's (AVL) vertical integration model has moved a step closer after its first flow battery left the factory and work on its pilot plant began.

Installation and commissioning of Western Australia's first vanadium flow battery is due in September after the battery left GILDEMEISTER's Austrian factory last week.

Earlier this year [AVL signed a dealership agreement](#) with GILDEMEISTER allowing its wholly owned subsidiary VSUN Pty to market and sell the German company's CellCube products in Australia for a five-year period.

Last week also saw construction start on AVL's [electrolyte pilot plant](#).

The drive towards a vertically integrated business model comes as AVL develops its Gabanintha Vanadium project in Western Australia.

AVL's managing director Vincent Algar was recently made the chairman of not-for-profit international organisation Vanitec's newly created Energy Storage Committee.

Vanitec's members include all the world's major vanadium producers.

Its role is to identify future global vanadium demand, the quality required and OH&S guidelines surrounding electrolyte production and distribution.

The Energy Storage Committee will report to the Vanitec Market Development Committee and will oversee developments in the energy industry market for vanadium.
